

CLAIMS

I claim a fluid resistant material comprising:

1. A plurality of contiguous concave reservoir basins containing holes within crests of basin walls separating such basins.
2. The material of claim 1 is buried relatively horizontal to a soil surface beneath agricultural crops, agricultural, turf, garden, forestry and other cultivars or plant seeds or plant seed.
3. Strips of material each comprising a plurality of contiguous concave reservoir basins whereby such strips are buried and spaced apart so as to provide a nominal opening between each strip of such material.
4. The material of claim 3 is buried relatively horizontal to a soil surface beneath agricultural crops, agricultural, turf, garden, forestry and other cultivars or plant seeds or plant seed.
